**3 Register of Ships P-Z**

**Additional sections in Volume P-Z include**

**Ship's names commencing with an Arabic numeral**

**Former names of ships as recorded in the Register of Ships**

**Compound names of ships as recorded in the Register of Ships**

**Mooring buoys classed with Lloyd's Register**

**Miscellaneous pontoons classed with Lloyd's Register**

**Docking installations classed with Lloyd's Register**

# Register Books and Statistical Publications

issued by the Committee of Lloyd's Register of Shipping

**Register of Ships**
Published annually in July (in three volumes A-G, H-O and P-Z) the Register contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known self-propelled sea-going merchant ships in the world with a gross tonnage of 100 and above. Air cushion vehicles (including those classed by Lloyd's Register) can now be found in the main body.

Volume 3 includes information covering former names of ships, compound names of ships, Lloyd's Register classed mooring buoys, miscellaneous pontoons and docking installations.

The Register is kept up to date by means of cumulative monthly Supplements containing changes of name, ownership, flag, tonnage, etc. for all ships, together with a cumulative list of new ships not recorded in the Register itself. As data in Supplement 11 is not included in the Register of Ships, but is repeated in Supplement 1, subscribers should retain their copy of Supplement 11 until receipt of Supplement 1. Also included is a Classification Survey Dates section containing the latest survey records for all Lloyd's Register classed ships. The Supplement will be issued for the eleven months August 1992 to June 1993.

A **Weekly List of Alterations** to the Register of Ships is also published.

**List of Shipowners**
Published annually in September this volume contains a list of owners and managers of the ships recorded in the Register with their fleets, postal addresses, telephone numbers, telefax numbers, telex numbers and cable addresses. Managing agents, not recorded in the Register of Ships, are shown together with ships for which they act and are cross-referred to owners.

Nine cumulative monthly supplements will be issued from October 1992 to June 1993.

**Statistical Tables**
Widely recognised as the authoritative source of worldwide merchant fleet statistics, this annual publication is based on the 78,000 entries in the Register of Ships. The Tables include analyses by flag, size, age and ship-type. There are also time series tables for the merchant fleets (1925-1992), ships launched and completed (1975-1991) and ships totally lost and broken up (1985-1991).

**Casualty Return**
Published annually in June, the Casualty Return comprises statistical summaries of all merchant ships totally lost or reported broken up during the previous calendar year. Brief details of all the ships included in the above summaries are also given, together with details of incidents and disposal.

**Register of Classed Yachts**
Published annually, this Register contains full particulars of yachts currently holding the Society's class, together with records of periodical surveys carried out. Names and addresses of owners are also included.

**Register of Offshore Units, Submersibles and Underwater Systems**
Published annually in October, the sections include units in existence and under construction and contain mobile drilling rigs able to operate in at least 50 feet of water, former names of mobile drilling rigs, submersibles, underwater systems (where classed with Lloyd's Register), selected work units (ships, barges and platforms used for offshore construction, maintenance, pipelaying, heavy lifting, fire-fighting and submersible and diving support) and former names of work units. Also included is a list of owners' names, addresses, telex, telephone and telefax numbers, for owners of equipment in these sections together with a section which includes owners and managers of offshore support ships with their addresses, telex, telephone and telefax numbers, listing the ships owned or managed by them. Further details of these vessels may be found by reference to the Register of Ships.

**Maritime Guide**
Published annually in February, the Maritime Guide includes sections on dry and wet docks, a gazetteer, maps, postal and telecommunication addresses, call signs (indexed to ship name), shipbuilders with names of existing ships built by them, shipbuilders, marine enginebuilders, boilermakers and manufacturers of offshore and associated structures listed by country and addresses of marine insurance companies.

**Merchant Shipbuilding Returns**
A quarterly statistical summary of world shipbuilding for all self-propelled merchant ships of 100 gross tonnage and above which are on order or under construction. Tables include analyses by country of build, size, ship-type and registration.

**Annual Summary of Merchant Ships Completed**
A statistical summary of world shipbuilding with tables covering completions and launches, based on similar criteria to the Merchant Shipbuilding Returns.

**Shipyard Orders Weekly Report**
A list of confirmed new orders reported during the week, showing selected items of information. Also included are sections on reported cancellations and completions.

**Lloyd's World Shipowning Groups**
Published jointly by Lloyd's Register and Lloyd's of London Press, this 850 page quarterly publication details who owns what in world shipping. Group and company address and communication details are included as well as basic information on each vessel.

**Subscription and prices**
Terms of subscriptions and prices are available fro

# Rule Books and other technical publications

issued by the Committee of Lloyd's Register of Shipping

**Rules and Regulations for the Classification of Ships**

These Rules contain:

Part
1 **Regulations** – Classification and periodical survey
3 **Ship Structures**
  The basic structural philosophy of hull construction, longitudinal strength, aft end structures, superstructures, etc.
4 **Ship Structures**
  Hull construction requirements for specific ship types, e.g. tugs, ferries, bulk carriers, oil tankers and container ships
5 **Main and Auxiliary Machinery**
  Main and auxiliary machinery including shaft vibration and alignment; piping systems for oil and chemical tankers and steering gear.
6 **Control, Electrical, Refrigeration and Fire**
  Automation and control systems, electrical systems, refrigeration systems and fire prevention systems.
7 **Other Ship Types and Systems**
  Highly specialised ships to which the format of the rest of the Rules cannot easily be applied i.e., nuclear ships; ships with installed process plant; fire-fighting ships; dynamic positioning installed in ships; oil recovery ships; ship to shore ramps and linkspans; burning of coal in ships' boilers; positional mooring systems and thruster assisted positional mooring systems.

Rules for the Manufacture Testing and Certification of Materials (formerly Part 2)

Lists of Approved
  Manufacturers of Materials
  Recognized Proving Establishments
  Class 1 Welding Firms

Each Part of the above Rules may be obtained separately.

**Rules for Yachts and Small Craft**

Part
1 **Regulations**
  Chapter
  1 General Information
  2 Classification Regulations
  3 Periodical Survey Regulations for Yachts
  4 Periodical Survey Regulations for Small Craft

2 **Hull Construction**
  Chapter
  1 General Requirements
  2 Glass Reinforced Plastics
  3 Steel and Aluminium Alloys
  4 Wood and Composite
  5 –
  6 Hull Arrangements

3 **Machinery and Electrical Installations**
  Chapter
  1 General Requirements for the Design and Construction of Machinery
  2 Main Propulsion Shafting and Propellers
  3 Pumps and Piping Systems
  4 Electrical Installations
  5 Control Engineering Systems

Each Part of the above Rules may be obtained separately.

**Rules for Inland Waterways Ships**

EXTRACT NO. 1
**Part 1**
**Regulations.** Classification and periodical surveys

EXTRACT NO. 2
**Part 2**
**Materials for Ships and Machinery Construction**

EXTRACT NO. 3
**Part 3**
**Ship Structures.** Structural design, longitudinal strength, fore and aft end structure, bulkheads, superstructures, deckhouses, bulwarks, ship control systems.

**Part 4**
**Ship Structures.** General cargo ships, bulk carriers, container ships, ferries, ro-ro, passenger ships, oil and chemical tankers, liquid gas tankers, etc.

EXTRACT NO. 4
**Part 5**
**Main and Auxiliary Machinery.** Including oil engines, main propulsion shafting, torsional vibration of shafting, strengthening for navigation in ice, pressure vessels other than boilers, ship piping systems, piping systems for ships intended for the carriage of liquids in bulk.

EXTRACT NO. 5
**Part 6**
**Control, Electrical and Fire.** Control engineering systems, electrical installations, fire protection, detection and extinction.

**Rules and Regulations for the Classification of Mobile Offshore Units**
The *Rules* now appear in six parts contained in a substantial binder (included in the price).
Parts 1-4 available as one volume.

**Part 1**
**Regulations** – Classification and periodical surveys.

**Part 2**
**Materials** – Conditions for manufacture, survey and certification and requirements for high holding power anchors and special quality chain cable.

**Part 3**
**Structure** – Unit structural requirements, unit types, strength, mooring equipment and steering arrangements.

**Part 4**
**Stability, Watertight/Weathertight Integrity and Corrosion Control** – Requirements for stability, load lines, watertight and weathertight integrity, guard rails, bulwarks and corrosion control.

Parts 5 & 6 available as separate volumes.

**Part 5**
**Main and Auxiliary Machinery** – Main and auxiliary machinery including shaft vibration and alignment, piping systems, pressure vessels and steering gear.

**Part 6**
**Control, Electrical, Hazardous Areas, Fire-fighting Units and Dynamic Positioning Systems** – Control systems, electrical systems, hazardous areas, fire-fighting units, and dynamic positioning systems.

**Rules and Regulations for the Classification of Fixed Offshore Installations**

**Rules for Submersibles and Underwater Systems**

**Rules for Floating Docks**

**Rules for Refrigerated Stores, Container Terminals & Process Plant**

**Rules for Ships for Liquefied Gases**

**Rules and Regulations for the Construction and Classification of Ships for the carriage of Liquid Chemicals in Bulk**

**Code for Lifting Appliances in a Marine Environment**

**Container Certification Scheme**

**MARPOL 73/78 Construction, Equipment and Surveys**

**Provisional Rules for the Classification of Shipborne Navigational Equipment**

**Provisional Rules for Ships with Integrated Fire Protection Systems (IFP)**

**Provisional Rules for the Assignment of Class Notation**

**Guidance Notes and Requirements for Air Cushion Vehicles**

**Lists of Approved:**
**Manufacturers of Materials**
**Proving Establishments**
**Class 1 Welding Firms**
**Firms for Product Certification by Surveillance of Quality Systems**

**Approved Coatings**

**LR Type Approval System:**
**List of Type Approved Products**
**Part 1**
**Marine, Offshore and Industrial Equipment**
**Part 2**
**Electrical Equipment (Environmentally Tested)**
**Part 3**
**Control Equipment (Environmentally Tested)**
**Part 4 Sections A and B**
**Fire Protection and Fire Fighting**

**Refrigerated Stores and Container Terminals Classed with Lloyd's Register**

**International Register of Electrical Equipment Certified for Use in Flammable Atmospheres**

**Subscription and prices**
Terms of subscriptions and prices are available from:

## Notice and terms of use

Neither Lloyd's Register of Shipping, nor its officers, employees or agents shall be responsible or liable in negligence or otherwise howsoever in respect of any inaccuracy contained herein or omission herefrom.

Without derogating from the generality of the foregoing neither Lloyd's Register of Shipping, nor its officers, employees or agents shall be liable for any indirect of consequential loss caused by or arising from any inaccuracy herein or omission herefrom.

# Notes on the 1992-93 Register of Ships

### Column Headers

Headers in eight languages, to assist in reading particulars of a ship in the Register, will be found inside the front cover of the first volume.

### Alphabetical order of ships

Ships' names commencing with an *abbreviation of a word,* e.g. DR. (Doctor) or ST. (Saint), are to be found listed in strict alphabetical order *immediately before* other ships whose names commence with the letters DRA or STA respectively.

Ships' names commencing with a *Roman numeral* are listed under the letter of the numeral, e.g. XXX ANIVERSARIO appears under letter X.

### Conversion Factors

1 tonne = 0,984 ton (British)
1 mm = 0,039 in
1 m = 3,281 ft
1 $m^2$ = 10,764 $ft^2$
1 $m^3$ = 35, 315 $ft^3$
°F = (1,8 x °C) + 32
1 kW = 1,341 hp (British) = 1,360 hp (metric)

**Tonnes per centimetre immersion** (Column 3)
The weight in tonnes required to immerse the hull by one centimetre at a particular draught.

**Dimensions** (Column 5)
Additional dimensions include the distance from bow to centre manifold, the diameter and the approximate height of the manifold above the upper deck.

**Tanker details** (Column 6)
Additional tanker information includes:
  Bow loading facility
  Stern discharge facility
Number of cargo pumps with total discharge capacity
Also recorded are details of cargo tank protection in terms of double bottom, double deck and double skin side.

### Air Cushion Vehicles

Air cushion vehicles classed by Lloyd's Register, previously shown in the Subsidiary Section, now appear in name order in the main body.

# Abbreviations used in the Register

## 1

### LR number

A unique seven digit identification number printed in **bold type** which is used for data processing purposes, and which remains unchanged during the life of the ship.
Now recognised by the International Maritime Organisation (IMO).

### Call sign

Signal letters or radio call sign assigned by the relevant national authority.

### Official No.

The identification number assigned by the national authority.

### Fishing No.

The identification number assigned by the national authority to ships engaged in the fishing industry.

### Navigational aids and Communication facilities

| | |
|---|---|
| CollRdr | Collision Radar |
| Df | Direction finder |
| Esd | Echo sounding device |
| Gc | Gyro-compass |
| Pfd | Position fixing device |
| Rdr | Radar |
| RT | Radio-Telephone |
| RTm | Radio-Telephone (medium frequency) |
| RTh | Radio-Telephone (high frequency) |
| RTv | Radio-Telephone (very high frequency) |
| SatNav | Satellite Navigation |
| SatCom | Satellite Communication |

### AMVER

Automated Mutual-Assistance Vessel Rescue System.

## 2

### Former names

The figures following the former name of a ship indicate the year in which the change of name occurred. Former names are retained in the Register throughout the life of the ship, and an index to these names is included in the Register of Ships Subsidiary Sections.

### Owners

The registered owners are recorded in **bold type.** The underlined letter in each owner's name indicates the letter under which the entry appears in the List of Shipowners.

### Managers

The managers of the ships are recorded if desired. The underlined letter in each manager's name indicates the letter under which the entry appears in the List of Shipowners.

### Port of Registry

A port printed in *italic type* is the home port of a ship and is shown where there is no port of registry.
An entry printed in parentheses indicates the last known port of registry.

### Flag

Indicates national flag under which the ship normally operates.
An entry printed in parentheses indicates the last known flag.

N.B. Ships registered in the former U.S.S.R. will be shown as 'last known' port and flag until confirmation of re-registration is received.

China* indicates ships with home ports in China, Republic of (Taiwan).

### Satellite Communication Identity No.

The identification number and answerback assigned by the appropriate authority.

## 3 (TONS)

### Gross tonnage

The Gross Tonnage printed in **bold type** indicates that the ship has been measured in accordance with tonnage regulations adopted prior to the coming into force of the International Convention on Tonnage Measurement of Ships 1969 on 18th July 1982. This Gross Tonnage is broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, fuel, passengers and crew, with certain exceptions, divided by 100. Thus 100 cubic feet of capacity is equivalent to 1 gross ton.
The Gross Tonnage printed in *italic type* indicates that the ship has been measured in accordance with the requirements of the International Convention on Tonnage Measurement of Ships1969 and is derived by formula in accordance with those requirements.

### Net tonnage

The Net Tonnage is derived from the corresponding Gross Tonnage printed in bold type by deducting spaces used for the accommodation of the master, officers, crew, navigation, and propelling machinery.
The Net Tonnage printed in *italic type* is derived by formula in accordance with the requirements of the International Convention on Tonnage Measurement of Ships 1969.

### Deadweight

The weight in tonnes (1000 kg) of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

### Shelter deck ships

OSD/CSD in column 6 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the CSD condition are greater than in the OSD. When available, tonnages for both conditions are recorded in the Register, the lower (OSD) tonnages printed above the greater (CSD) tonnages.

### T.Mk (Tonnage Mark)

T.Mk in column 3 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.
In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.
In other cases only one set of tonnages is recorded. In these the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line; the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

### Ore/Oil carriers

Two gross and two net tonnages may also be recorded for a ship which is designed to carry either ore or oil cargoes.

### Tonnes per centimetre immersion

The weight in tonnes (1000 kg) required to immerse the hull by one centimetre at a particular draught. The value shown in the Register is that corresponding to the maximum summer draught.

# 4 (CLASSIFICATION)

## Classification symbols of Lloyd's Register of Shipping Hull and equipment

| | |
|---|---|
| ✠ | This distinguishing mark denotes that the ship was constructed under the Society's Special Survey in compliance with the Society's Rules. |
| **100** | Character figure assigned to ships considered suitable for sea-going service. |
| **A** | Character letter assigned to ships which have been constructed or accepted into class in accordance with the Society's Rules and Regulations and which are maintained in good and efficient condition. |
| **1** | The character figure is assigned to:<br>(a) Ships having on board, in good and efficient condition, anchoring and/or mooring equipment in accordance with the Rules.<br>(b) Ships classed for special service, for which no specific anchoring and mooring Rules have been published, having on board, in good and efficient condition, anchoring and /or mooring equipment considered suitable and sufficient by the Society for the particular service. |
| — | This character symbol, in the position usually occupied by the figure **1**, is assigned to ships when the anchoring and mooring equipment is not in accordance with the requirements of the Rules but is considered to be acceptable for the particular service. This symbol no longer assigned. |
| **N** | Character letter assigned to ships on which anchoring and mooring equipment need not be fitted in view of their particular service. |
| **T** | Character letter assigned to ships which are intended to perform their primary designed service function only while they are anchored, moored, towed or linked and which have in good and efficient condition, adequately attached anchoring, mooring, towing or linking equipment which has been approved as suitable and sufficient for the inland service. |
| **OU** | Character letters assigned to offshore units classed with Lloyd's Register, assigned to self-propelled or non-propelled offshore units other than ships. |
| Cont. or Rest | Indicates continuation or restoration of class after the original term of years has expired. A number of years suffixed to the character, thus -8yrs, indicates the period of extension granted. |
| with freeboard<br>with fbd | Signifies that the freeboard assigned is a condition of the ship's class. The scantlings of ships built since 1949 are based upon a specific draught and this notation is no longer assigned. |

## Classification symbols of the British Corporation (united with Lloyd's Register in 1949) Hull and equipment

| | |
|---|---|
| ***** | Denotes that the ship was built under the supervision of the surveyors in accordance with the Rules of the British Corporation. |
| **BS** | Hull and equipment of iron or steel ships classed according to British Corporation Rules. |
| **BS (Comp)** | Hull and equipment of composite ships classed according to British Corporation Rules. |
| **(EI)** | Equipment incomplete. Indicates that the equipment of the ship is not in accordance with the full tabulated requirements. |
| with freeboard<br>with fbd | Denotes that the hull has been built with modified scantlings and arrangements approved for service in any part of the world at the assigned freeboard.<br>This notation was discontinued in 1947. |

## Descriptions and abbreviations used in classification notations

Service restriction notations will generally be assigned in one of the following forms but this does not preclude special consideration for other forms in unusual cases.

Protected waters service: Prior to 1978, this notation indicated that the ship was intended to operate only within protected waters of harbours, rivers, lakes and sheltered estuaries having a fetch of 6 nautical miles or less. The description of this service, as amended by the Society's Classification Regulations effective from January 1978, means that the ship is suitable for service in sheltered water adjacent to sandbanks, reefs, breakwaters or other coastal features, and in sheltered water between islands.

Extended protected waters service: This notation means that the ship is intended for service in protected waters and also for short distances (generally less than 15 nautical miles) beyond protected waters in reasonable weather.

('Fetch', 'sheltered water' and 'reasonable weather' are defined in the Society's Classification Regulations.)

Restricted service: This notation means that the ship is intended to operate in estuaries, harbours and/or adjacent waters, and also outside sheltered water but only for short distances (generally less than 15 nautical miles) and in reasonable weather. This notation is no longer assigned.

Specified coastal service: This notation means that the ship is intended for service along a coast, the geographical limits of which are indicated, and for a distance out to sea generally not exceeding 21 nautical miles, unless some other distance is specified for 'coastal service' by the Administration with which the ship is registered, or by the Administration of the Coast off which it is operating, as applicable.

Specified route service: This notation means that the ship is intended for service between two or more ports or other geographical features which are indicated.

Specified operating area service: This notation means that the ship is intended for service within one or more geographical areas as indicated.

Short international voyage: This expression means an international voyage in the course of which a ship is not more than 200 nautical miles from a port or place in which the passengers and crew could be placed in safety, and which does not exceed 600 nautical miles in length between the last port of call in the country in which the voyage begins and the final port of destination. This notation is no longer assigned.

Prior to 1948, the character figure **100** was not included in the class notation of ships intended for limited sea-going service.

Heavy Cargoes (i.e. ore etc.). When the scantlings and arrangements have been approved for the carriage of such cargoes a class notation 'Strengthened for heavy cargoes' is assigned. As from January 1978 this notation will continue to be assigned to general cargo ships and bulk carriers, where applicable, but in the case of ore or oil carriers the class notation 'ore carrier' or 'ore or oil carrier' will be assigned.

| | |
|---|---|
| APT | After Peak Tank |
| B | Bridge |
| (cc) | An approved system of corrosion control fitted in association with reduced scantlings. |
| ((cc)) | When the (cc) notation is embraced by additional parentheses, this indicates that the approved system of corrosion control has not been maintained in an effective condition. |
| CG | Cargo gear on ships |
| CL | Cargo Lifts |
| CR | Cargo Ramps |
| CR | Corrosion Resistant material or special corrosion resistant linings. The suffix in parentheses indicates the type of material or lining. |
| (cr) | centre |
| DB | Double Bottom |
| DP(AA) | Dynamic Positioning with fully redundant automatic control system |
| DP(AAA) | Dynamic Positioning with fully redundant automatic control system and emergency automatic control system |
| DP(AM) | Dynamic Positioning with automatic and centralised remote manual control system |
| DP(CM) | Dynamic Positioning with centralised remote manual control system |
| DT | Deep Tank |
| DTs | Deep Tanks |
| DTa | Deep Tank aft |
| DTf | Deep Tank forward |
| DTm | midship Deep Tank |
| DTma | midship Deep Tank aft |
| DTmf | midship Deep Tank forward |
| ER | Engine Room |
| FP–°C | Flash Point in degrees Celsius |
| FPT | Fore Peak Tank |
| ICC | Integrated Computer Control |
| IFP | Integrated Fire Protection |
| IP | Integrated Propulsion |
| I.W.S. | Ship arranged for In Water Survey |
| LA | Lifting Appliance |
| LMA | Lloyd's Manœuvring Assessment |
| LNC | Lloyd's Navigational Certificate |
| LNC(A) | Lloyd's Additional Navigational Certificate |
| LNC(AA) | Lloyd's Navigational Certificate for Periodic One-Man Watch |
| L.S.O. | Loading Sequence Accelerated |
| L.S.T. | Loading Sequence Normal |
| PC | Cranes on Platforms |
| PCR | Performance Capability Rating. This is a supplementary notation for Dynamic Positioning Systems. The numbers in parentheses indicate rating numerals |
| PL | Passenger Lifts |
| PM Ⓣ | Position Mooring |
| PMC Ⓣ | Position Mooring in Close Proximity |
| PM | Position Mooring with Thruster assist |
| PMC | Position Mooring with Thruster assist in close Proximity |
| pv | pressure/vacuum relief valves for cargo tanks wit positive setting where greater than 0,2 bar |
| SEA | Ship Event Analysis |
| SEA(R) | Ship Event Analysis Continuous Data Recording Capability |
| SG | Specific Gravity (relative density) where greater th 1,025 |
| SPM | Single Point Mooring |
| S.W.B.M. | Still Water Bending Moment |
| TwD | 'Tween Deck tank(s) |
| Ship Type 1<br>Ship Type 2<br>Ship Type 3 | These notations are assigned to chemical tankers which comply with the relevant requirements of the Society's Rules and Regulations for the Construction and Classificatio of Ships for the Carriage of Liquid Chemicals in B incorporating the IMO International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk, where an International Certificate of Fitness for the Carriage Dangerous Chemicals in Bulk is issued by the Society. |
| Ship Type 1*<br>Ship Type 2*<br>Ship Type 3* | These notations are assigned to chemical tankers which comply with the relevant requirements of the above named Rules, where th International Certificate of Fitness is to be issued an Authority other than the Society. In such instances, an asterisk is appended to the Ship Ty to indicate that the ship survival capability and operational requirements of the IBC Code are not within the scope of the classification Rules. |
| Type A<br>Type B<br>Type C | Refer to chemical cargoes for the carriage of which the ship has been approved, listed on an appendage to the Classification certificate |
| Type I<br>Type II<br>Type IIA<br>Type III<br>Type IIIA<br>Type IV<br>Type V | These entries indicate compliance with the relevant requirements of the Society's Rules and Regulations for the Classification of Inland Waterways Ships intended for the Carriage of Liquids in Bulk. They incorporate the requirements contained in the United Nations Recommendations (A.D.N.) and the Central Rhine Commissions' Regulations (A.D.N.R.) concerning the Transport of Dangerous Goods on the Rhine. |

## Ice classification—degrees of strengthening for navigation in ic

| | |
|---|---|
| Ice Class 1*<br>Ice Class 1<br>Ice Class 2<br>Ice Class 3 | For general service |
| 1AS<br>1A<br>1B<br>1C<br>1D | For general service |
| AC1<br>AC1-5<br>AC2<br>AC3 | For Arctic and Antarctic Service |
| ICE | For inland waters |
| Str. nav. ice | This notation is no longer assigned, except for trawlers, having been superseded by the Classes given above. |
| Ice Class A<br>Ice Class B<br>Ice Class C<br>Ice Class D<br>Ice strengthening<br>Ice stiffening | Previously assigned to ships classed with the British Corporation |

The ice classification is shown in parenthesis when it is temporarily suspended.

**Special surveys**

| | |
|---|---|
| SS-with date | Special Survey. A record of any later Special Survey will be published in the monthly Supplement to the Register. |
| M-with date | Modified Special Survey, indicating that the ship has been surveyed for the appropriate Special Survey but repairs effected only for a limited period. The period for which the class is maintained follows the date. |
| CS-with date | Continuous Survey of the hull. |
| (Adv)-with date | As a result of a General Examination the date of Special date Survey previously assigned has been advanced to the date now shown, the ship having meantime been continuously laid up. |
| Lake SS | Periodical Survey of ship classed for Great Lakes service |

Records of all periodical surveys will be found in the Classification Survey Dates Supplement.

**Machinery**

| | |
|---|---|
| **✠LMC** | Notation assigned when the propelling and essential auxiliary machinery has been constructed, installed and tested under the Society's Special Survey and in accordance with the Society's Rules. |
| ***LMC** | Notation assigned when the machinery and/or boilers were constructed to British Corporation class and installed in a ship classed with Lloyd's Register. |
| **✠̄LMC** | Notation assigned when the propelling and essential auxiliary machinery has been constructed under the survey of a recognized authority in accordance with Rules and Regulations equivalent to those of the Society and, in addition, the whole of the machinery has been installed and tested under the Society's Special Survey in accordance with Society's Rules. |
| **LMC** | Notation assigned when the propelling and essential auxiliary machinery has neither been constructed nor installed under the Society's Special Survey but the existing machinery, its installation and arrangement, have been tested and found to be acceptable to the Society. |
| **(✠LMC)**<br>**(*LMC)**<br>**(✠̄LMC)** | When the LMC class is shown in parenthesis, this indicates that the class has been temporarily suspended. |
| **MBS** | Machinery classed according to British Corporation Rules. |
| **MBS***<br>**MBS✠** | Denotes that the machinery was built and installed under the supervision of the surveyors to the Rules of the British Corporation or of Lloyd's Register respectively. |
| $\mathbf{MBS}^{E\maltese}_{B\star}$ | Machinery classed according to British Corporation Rules. Engines surveyed during construction by Lloyd's Register and boilers by British Corporation surveyors. |
| $\mathbf{MBS}^{E\star}_{B\maltese}$ | Machinery classed according to British Corporation Rules. Engines surveyed during construction by British Corporation and boilers by Lloyd's Register surveyors. |
| **UMS** | This notation may be assigned to a ship classed with Lloyd's Register. It denotes that the ship can be operated with the machinery spaces unattended and that the control engineering equipment has been arranged, installed and tested in accordance with the Society's Rules. |
| **(UMS)** | When the **UMS** notation is shown in parenthesis, this indicates that approval of the control engineering equipment has been temporarily suspended |
| **CCS** | This notation may be assigned to a ship classed with Lloyd's Register. It denotes that the ship can be operated with the machinery spaces under continuous supervision from a centralised control station and that the control engineering equipment has been arranged, installed and tested in accordance with the Society's Rules. |
| **(CCS)** | When the CCS notation is shown in parentheses, this indicates that approval of the control engineering equipment has been temporarily suspended. |

**Refrigerated cargo installations**

| | |
|---|---|
| **✠Lloyd's RMC** | Denotes that the refrigerated cargo installation of a ship is classed with Lloyd's Register and has been constructed, installed and tested under the Society's Special Survey in accordance with the relevant requirements of the Society's Rules. |
| **Lloyd's RMC** | Denotes that the refrigerated cargo installation of a ship is classed with Lloyd's Register and that the installation has been found to be equivalent to Rule requirements and has been tested in accordance with the relevant requirements of the Society's Rules. |
| **✠Lloyd's RMC (LG)** | This notation is assigned to a liquefied gas carrier or tanker classed with Lloyd's Register in which reliquefaction or refrigeration equipment is approved and fitted for cargo temperature and pressure control, where the equipment has been constructed, installed and tested in accordance with the relevant requirements of the Rules. |
| **Lloyd's RMC (LG)** | This notation is assigned to a liquefied gas carrier or tanker classed with Lloyd's Register in which reliquefaction or refrigeration equipment is fitted for cargo temperature and pressure control, where the equipment has been found equivalent to Rule requirements and tested in accordance with the relevant requirements of the Rules. |
| **(✠Lloyd's RMC)**<br>**(Lloyd's RMC)**<br>**(✠Lloyd's RMC (LG))**<br>**(Lloyd's RMC (LG))** | When the Lloyd's **RMC** class is shown in parentheses, this indicates that the class has been temporarily suspended. |

**Inert gas systems**

| | |
|---|---|
| **IGS** | This notation will be assigned to a ship classed with Lloyd's Register when the ship is intended for the carriage of oil in bulk, or for the carriage of liquid chemicals in bulk and is fitted with an approved system for producing gas and for inerting the cargo tanks in accordance with the requirements of the Society's Rules. |
| **(IGS)** | When the IGS notation is shown in parentheses, this indicates that approval of the inert gas system has been temporarily suspended. |

**Equipment Letter (EL)**

| | |
|---|---|
| A A† B*, etc. | Equipment Letters determined by the Society's Rules. These are followed by either the diameter and grade of chain cable on the ship or the length and diameter of the chain cable in metres and millimetres respectively and grade of chain cable. |
| (A) (A†) (B*), etc | The Equipment Letters are shown in parentheses when the actual equipment number permitted by the Rules differs from the calculated equipment number. |
| U1 U2 U3 U4 | Grades of chain cable, other than wrought iron or mild steel fire-welded, as defined in the Society's Rules. |
| a b† c*, etc. | Equipment Letters previously determined by the Society's Rules, but no longer assigned. The diameter of the chain cable is recorded only when it differs from that corresponding to the Equipment Letter or when it is of special quality steel. The diameter is also recorded when wrought iron chain cable of Grade 1a is fitted and this is qualified by the letters 'WI'. |
| (a) (b†) (c*), etc. | The letters in parentheses are employed to determine the fees for Special Surveys on the hill and are not Equipment Letters. If there is no letter in parentheses, the Equipment Letter is to be used for determining the fee for a Special Survey of the hull. |
| SQ | Indicates that the ship is provided with special quality steel cable. The letters will no longer be assigned since this quality of steel cable is referred to as Grade U2 in the Society's Rules. |
| ESQ | Indicates that the ship is provided with extra special quality steel cable. The letters will no longer be assigned since this quality of steel cable is referred to as Grade U3 in the Society's Rules. |
| FSWR<br>or<br>SWR | Indicates that the ship is provided with flexible steel wire ropes for use as towlines or mooring lines. The description of these ropes has been amended to steel wire ropes in the Society's Rules. |
| WI | Indicates that the ship is provided with wrought iron cable. |
| C | Followed by a numeral or letter gives equipment identification according to British Corporation Rules, the numeral indicating the size of wrought iron cable in sixteenths of an inch. Where this notation is followed by the letter S and a second numeral, the latter indicates the diameter of steel cable in sixteenths of an inch. |
| CT | Followed by a number, indicates the cubic tonnage of the ship calculated from the formula in the British Corporation Rules (1947), which is used for determining fees and equipment. |

**Fee Numeral**

| | |
|---|---|
| FN | Followed by a number, indicates the numeral which is used to determine the fees for Special Survey and other hull classification survey fees. |

**Withdrawal of Class**

'LR (or BC) class withdrawn—Owners request' indicates that when the Owners requested withdrawal of class from the Register Book, the rule requirements had up to that time been complied with.

'LR (or BC) class withdrawn' indicates that at the time of withdrawal of class from the Register Book, survey requirements had not been complied with.

'LR (or BC) class withdrawn—Reported defects' indicates that owing to reported defects, the ship was not entitled to retain her class in the Register Book.

**Classification with other Societies**

If a ship is classed with another Society, the initial letters of the Society are recorded as shown below. Where these letters are shown in parentheses indicates that the ship was previously classed with that Society.

| | |
|---|---|
| AB | American Bureau of Shipping |

# 5 (HULL)

**(HULL)**
Following the conversion of imperial to SI units in the 1975-76 Register it is possible that measurements in metres can be inaccurate by up to 30 millimetres.

**Date of build**
For ships built under the supervision of Lloyd's Register surveyors, the date of build, specified by the year and month, shall be the date at which the new construction survey process is completed. The date of commissioning may be specified in case of substantial delay between completion of construction and the ship commencing active service.

For ships built under the supervision of other classification societies, the date of build shall be the year as shown in their respective Registers. For other ships, the reported year of completion of construction is shown.

In all instances where there has been a significant interval between the launching and the completion or commissioning of the ship, two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd. means recommissioned.

**Shipbuilders and place of build**
This normally records the shipyard where the hull of the ship was built. When it is known that major sections of the hull have been constructed by other builders, their names are also recorded, but the entry of a single builder's name in no way implies that all of the hull has been fabricated in that yard.
The underlined letter indicates the letter under which the shipbuilder appears in the List of Shipbuilders.

**Yard number**
The shipbuilder's number(s) is shown for the hull section(s).

**Overall length**
The extreme length of the ship.
Bulbous bow (BB): When the overall length is followed by the notation (BB) this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow.

**Registered length**
If the overall length is not available, the registered length as given on the ship's Certificate of Registry, is recorded in *italics*, thus *124,62*.

**Length B.P.** (between perpendiculars)
The distance on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

**Extreme Breadth**
The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

**Moulded breadth**
The moulded breadth is the greatest breadth at amidships from heel of frame to heel of frame.

**Maximum draught**
In most cases this is the maximum summer draught amidships, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded.

FW (fresh water): for ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

OSD/CSD ships: For such ships, as indicated in column 6, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

Ships assigned tonnage marks: For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

**Moulded depth**
The moulded depth is the vertical distance at amidships from the top of keel to the top of the upper deck beam at side.

**Superstructures** (with lengths in metres)

| | |
|---|---|
| B | Bridge |
| F | Forecastle |
| H | Houses on deck (sometimes shown with a tonnage capacity) |
| P | Poop |
| R dk | Raised deck |
| RAD | Raised After Deck |
| RFD | Raised Fore Deck |
| RQD | Raised Quarter Deck |
| RSD | Raised Shelter Deck |
| Upr | Upper |

**Decks**

| | |
|---|---|
| A dk | Awning deck |
| dk | deck |
| fwd | forward |
| Irn | Iron |
| Prom dk | Promenade deck |
| pt | part |
| S dk | Shelter deck |
| Stl | Steel |
| teak s | teak sheathed |
| U dk | Upper deck |
| ws | wood sheathed |

**Riveted/Welded**

| | |
|---|---|
| R | Riveted |
| RW | Riveted and Welded |

When neither of these abbreviations is given it may be assumed that the ship's hull is welded throughout.

**Rise of floor**

| | |
|---|---|
| rf | rise of floor (or deadrise). The height above the base line of the intersection of the line of bottom produced beyond the bilge at amidships with the normal to the base line at half-breadth from the centre line. |

**Keel**

| | |
|---|---|
| BK | Bar Keel |
| Box K | Box Keel |
| DK | Duct Keel |
| fwd | forward |

**Length from bow to centre manifold**
The distance from the bow to the centre of the discharge manifold.

**Diameter**
The diameter of the largest discharge pipes.

**Manifold height**
The approximate height of the manifold above the upper deck.

**Alterations**

| | |
|---|---|
| alt | altered |
| conv | converted/adapted (from) |
| len | lengthened |
| ND | New Deck |
| pt | part |

**Cargo battens**

| | |
|---|---|
| NS | No Sparring (cargo battens not fitted) |
| SF | Sparring Fitted (cargo battens or equivalent fitted) |

**Bulkheads and associated decks**

| | |
|---|---|
| A dk | Awning deck |
| APBH | After Peak Bulkhead |
| Coll | Collision |
| PBH | Partial Bulkhead |
| S dk | Shelter deck |
| U dk | Upper deck |
| W dk | Weather deck |
| WT | Watertight |

**Water ballast**

| | |
|---|---|
| a | aft |
| BH | Bulkhead (tank) |
| btm | bottom |
| c | centre |
| Comb. | Combined |
| Dk | Deck (tank) |
| DT | Deep Tank |
| DTs | Deep Tanks |
| f | forward |
| incl. | including |
| m | midship |
| ST | Side Tank |
| STs | Side Tanks |
| T | Tonnes (1000kg) |
| t | tons (2240lb) |
| TwD | 'Tween Deck tank(s) |
| UnDk | Underdeck tank(s) |

# 6 (SHIP TYPE/CARGO FACILITIES)

**Description of ship**
Unless otherwise stated, ships are of steel construction. Where highe tensile steel is extensively used in the main hull structure of a ship classed with Lloyd's Register, a suitable note is inserted below the description of the ship.

The description of the ship given in this column is not a Lloyd's Regis classification notation. The information published in **bold type** on the first line indicates the basic type of the ship: the second line defines in more detail the known specific function of the ship. This information is obtained from sources which are believed to be reliable.

| | |
|---|---|
| Aux | Auxiliary propulsion machinery |
| D-E | Diesel-Electric |
| GT | Gas Turbine |
| GT-E | Gas Turbo-Electric |
| M | Motorship |
| P | Paddle |
| Q | Quadruple screw |
| S | Steamship |
| T | Twin screw |
| T-E | Turbo-Electric |
| Tr | Triple screw |
| Comp | Composite construction |
| CBT (LR) | Clean Ballast arrangements certificated by Lloyd' Register in accordance with MARPOL 73/78 |
| CBT | Clean Ballast arrangements reported–not certificated by Lloyd's Register |
| COW (LR) | Crude Oil Washing certificated by Lloyd's Registe in accordance with MARPOL 73/78 |
| COW | Crude Oil Washing reported to be installed–not certificated by Lloyd's Register |
| IGS (LR) | Inert Gas System fitted and approved in accordance with the requirements of Lloyd's Register's Rules |
| IGS | Inert Gas System reported to be installed–not classed by Lloyd's Register |
| PL | Protective Location |
| SBT (LR) | Segregated Ballast arrangements certificated by Lloyd's Register in accordance with MARPOL 73/ |
| SBT | Segregated Ballast arrangements reported–not certificated by Lloyd's Register |
| SDS<br>SDS(LR) | } SOLAS Damage Stability |
| SERS | Ship is registered with Lloyd's Register's 'Ship Emergency Response Service'. This service providing a rapid computer assisted analysis on damage stability, and damage longitudinal streng in the event of a casualty to the ship. |
| Ref | Ship fitted with refrigerated cargo installation |
| CSD | Closed Shelter Deck ship |
| OSD | Open Shelter Deck ship |
| OSD/CSD | A shelter deck ship which has arrangements for both the open and closed condition. (See note under Tonnages Column 3.) |
| Mchy. aft<br>Mchy. fwd | Machinery aft<br>Machinery forward { When the position of the Engine Room notation (ER) follows the details of tanks, holds and/or hatchways, this indicates the machinery fitted aft. In these instances the term 'Mchy. aft' is not published. |
| Str. | Strengthened |
| Ice strengthened | This indicates that *at the time of construction* the ship was assigned an ice classification notation by Classification Society. However, in the case of a sh at *present holding* the classification of Lloyd's Register, any valid ice classification notation assign by this Society is instead recorded in column 4. |
| CASPPR | Canadian Arctic Shipping Pollution Prevention Regulations. |

**Number of passengers**
The number of berths (bth), cabins (cbn), deck (dk) and drivers berths (bth D) are recorded separately.
Where individual categories are unknown, passengers (P) are recorded thus: 300P

**Bollard Pull for Tugs/Supply Ships**
SBP indicates that the ship has been issued with an LR Certificate confirming that the Steady Bollard Pull shown was achieved over a minimum duration of 5 minutes.

**RoRo Facilities**

| | |
|---|---|
| Lane Length | Total maximum linear lane length in metres availa for storage of vehicles/wagons. |
| Cargo Width | Maximum width of loadable cargo in metres. |
| Car height | Maximum deck head clearance between adjacen fixed or movable decks in metres. |

# 6

## (SHIP TYPE/CARGO FACILITIES) continued

| | |
|---|---|
| Cars<br>Lorries<br>Trailers<br>Rail Wagons<br>Ramp Details | Where applicable quoted figures are for a mix of vehicles. Not alternate loadings. |
| L | Maximum length of ramp excluding flaps in metres. |
| W | Maximum traversable width in metres. |
| SWL | Highest combined weight the ramp can safely sustain in tonnes. |
| (p) | Port. |
| (s) | Starboard. |

### Tanker Facilities

| | |
|---|---|
| Bow loading | Tanker fitted with a facility to load cargo over the bow, usually at an offshore mooring buoy. |
| Stern discharge | Tanker capable of discharging cargo over the stern. |

### Holds

Where possible, hold lengths are given in sequence forward to aft and are measured from bulkhead to bulkhead.

| | |
|---|---|
| ER | Engine Room. Within the sequence of holds, the letters ER indicate the position of the engine room. |
| comb. | combined |
| DT | Deep Tank |
| Ho | Hold(s) |
| Lwr | Lower |
| p or (p) | port |
| s or (s) | starboard |
| TwD | 'Tween Deck cargo space |
| Upr | Upper |
| G. | Grain capacity in cubic metres. The capacity of cargo spaces, measured to outside of frames, to top of ceiling and to top of beams, including hatchways. (Insulated spaces are not included.)<br>For a part Container Ship the figure does not include spaces allocated to containers. |
| B. | Bale capacity in cubic metres. The capacity of cargo spaces, measured to inside of cargo battens, to top of ceiling and to underside of beams, including hatchways. (Insulated spaces are not included.)<br>For a part Container Ship the figure does not include spaces allocated to containers. |
| In. | Insulated capacity in cubic metres. In ships having refrigerated cargo installations the capacity is measured from the face of overhead, 'tween deck and tank top insulation lining, or the surface of 'tween decks where uninsulated; or from the face of brine pipes or air ducts; from the face of permanent cargo battens or air screens or air coolers or casings. Deductions are made for floor gratings which are part of the air circulation system, for pillars, stanchions and other fixtures which interfere with the cargo-carrying capacity, but not for loose or portable floor dunnage, or for portable bins or trays and their supports.<br>The insulated spaces are not included in the grain and bale capacities. |

### Containers

For a Container or part Container Ship the following information is recorded and is given by the owner or is obtained from other sources which are believed to be reliable.

| | |
|---|---|
| C. | Total carrying capacity in number and length(s) of laden containers.<br>This information is only recorded when the separate numbers of laden containers carried in holds and those on deck are not available.<br>This total capacity is also shown for a Lighter Carrier. |
| C.Dk | Carrying capacity in numbers and length(s) of laden containers on weather deck. |
| C.Ho. | Carrying capacity in numbers and length(s) of laden containers in holds. |
| Cell.Ho. | Holds fitted with fixed cellguides for the carriage of laden containers |

1. Inclusive of any refrigerated units.
2. Figures in parentheses indicate other lengths of containers a ship is fitted to carry.
3. All lengths are in feet.

| | |
|---|---|
| C. Ro-Ro Dk | Carrying capacity in numbers and length(s) of laden containers on internal decks accessed by doors and ramps |
| TEU | Carrying capacity expressed in number of twenty-foot equivalent units. |

### Tanks

| | |
|---|---|
| (alu) | aluminium |
| (C.mn.stl) | Carbon manganese steel |
| CR | Corrosion Resistant material or special corrosion resistant linings. The suffix in parentheses indicates the type of material or lining. |
| cs | Ship arranged for segregation of different cargoes (the number of segregations is given) |
| cyl | cylindrical |
| ind | independent |
| (Ni.stl) | Nickel steel |
| (r.l) | rubber lined |
| (s.stl) | stainless steel |
| Ta | Tanks (the number of tanks is given) |
| vert. | vertical |
| L. | Capacity of unspecified liquid cargoes in cubic metres. This is recorded as 98% of the total volume of the cargo carrying capacity, allowing 2% for expansion where known. |
| L. (gas) | Capacity in cubic metres of liquefied gas cargo, this is recorded as 100% of the total volume of the cargo carrying capacity. |
| L. (oil) | Capacity in cubic metres of oil cargo, this is recorded as 98% of the total volume of the cargo carrying capacity, allowing 2% for expansion where known. |
| HeCls. B | Heating Coils in Bunkers |
| ptB | part Bunkers |
| HeCls. C | Heating Coils in Cargo tanks |
| ptC | part Cargo tanks |

### Cargo Pumps

The number of cargo pumps is recorded together with the total discharge capacity expressed in tonnes of water per hour.

### Hatchways

Weather deck hatchways only are recorded. The sizes are given in order, where possible, commencing at No.1 from forward. Measurements to the inside of coamings are recorded. Where two hatchways can be combined to form one large hatchway, only the combined size is given, and the two hatchways counted as one.
The total length is followed by the abbreviation comb. The material of hatch covers is recorded when known.

| | |
|---|---|
| ER | Engine Room. Within the sequence of hatchways, the letters ER indicate the position of the engine room. |
| (alu) | aluminium |
| comb. | combined |
| Ha | Hatchway(s) |
| (irn) | iron |
| p or (p) | port |
| s or (s) | starboard |
| (stl) | steel |
| T | Tapered hatchway, followed by the measurement of the narrower breadth of this hatchway |
| (w) | wood |

### Winches, cranes and derricks

| | |
|---|---|
| W | Winches (prefixed by the number of winches). Cargo winches only are recorded, and not those used for other purposes. |
| Cr | Cranes (followed by the number of cranes and, in parentheses, the stated safe working load in tonnes). |
| Der | Derricks (followed by the number of derricks and, in parentheses, the stated safe working load in tonnes). |
| Der/Cr | Derricks/Cranes (followed by the number of derricks/cranes, in parentheses, the stated safe working load in tonnes). |
| G.Cr | Gantry/Cranes (followed by the number of gantry/cranes, in parentheses, the stated safe working load in tonnes). |
| A.Fr | A-Frame (followed by the number of A-Frames in parentheses, the stated safe working load in tonnes). |
| M.Cr | Mobile Crane (followed by the number of mobile cranes in parentheses, the stated safe working load in tonnes). |

# 7

## (MACHINERY)

### Engines

| | |
|---|---|
| a.c. | alternating current |
| C | Compound expansion engines |
| (CC) | Constant Current system |
| Cy | Cylinders. The preceding figures indicate the number of cylinders and those which follow are the cylinder diameter and length of stroke. |
| D | Diagonal engines |
| DA | Double Acting. The number prefixed indicates the stroke cycle. |
| d.c. | direct current |
| dr | double reduction (gearing) |
| E | Engine(s) (refitted indicates that the engine(s) now fitted has been used previously either in the same or in another ship). |
| elec. | electric |
| Emy. | Emergency |
| gen. | generator(s) |
| H | Horizontal engines |
| HP | High Pressure |
| IP | Intermediate Pressure |
| kW | kilowatts |
| LP | Low Pressure |
| M.E. | Main Engine(s) |
| NE | New Engine(s). (The ✠ or ★ indicates that the engine(s) fitted at the date recorded were built under the supervision of the surveyors to the Rules of Lloyd's Register or of the British Corporation respectively.) |
| Q | Quadruple expansion engines |
| S | Simple expansion engines(s) |
| SA | Single Acting. The number prefixed indicates the stroke cycle. |
| sc. | screw |
| sr | single reduction (gearing) |
| S Turb | Steam Turbine |
| (Sy) | Synchronous system |
| T | Triple expansion engines |
| tr | triple reduction (gearing) |
| U | Unaflow or Uniflow |
| V | volt |
| (WL) | Ward Leonard system |

### Power

For engines classed in accordance with Lloyd's Register or British Corporation Rules, the power recorded is the total maximum designed shaft power approved. For steam reciprocating engines the indicated power is recorded. In ships not classed with the Society, the power recorded is the total maximum service power as reported by the owners or as obtained from other reliable sources.

In diesel-electric or turbo-electric machinery, the total shaft power of the oil engines or turbines is recorded, together with the rated power output and voltage of each electric generator and each electric motor.

| | |
|---|---|
| bhp | brake horsepower (oil engines) |
| ihp | indicated horsepower (steam reciprocating engines) |
| kW | kilowatts |
| shp | shaft horsepower (turbines and electric motors) |

### Design

The engine design is recorded together with the designation of makers type where known.

### Auxiliary electrical generating plant

The number of generators is given, followed by the rated power output and voltage, d.c. or a.c., of each generator and, in an a.c. installation, the frequency in hertz (Hz). These are listed in descending order of rated power output. Emergency sources of power and sets used solely for harbour purposes are not recorded.

### Fuel bunkers

The capacity of the bunkers is recorded in tonnes (t), followed by an indication of the fuel for which the machinery is fitted. The tonnage of fuel used in one day is recorded thus: 4,5pd (per day). This information is as stated by the owners or as obtained from other reliable sources.

| | |
|---|---|
| (c) | Burning coal |
| (d.o) | Burning diesel oil |
| (hvf) | Fitted for burning high viscosity fuel |
| (i.f.o.) | intermediate fuel oil |
| (o.f) | oil fuel |

The coal capacity is the capacity of all permanent bunkers.
The oil fuel capacity is the capacity of all spaces, including double bottom spaces, which are permanently fitted for the carriage of oil fuel and which have permanent provision for its use on board.
The capacity of settling tanks is included.

# 7 **(MACHINERY)** continued

### Special propellers

Special type propellers are recorded, i.e. directional, controllable pitch and athwartship thrust propellers. The fitting of propellers both forward and aft is also indicated. Bow and stern jet pumps are published when known.

### Speed in knots

The speed recorded is that which the ship is stated to be capable of maintaining at sea in normal weather and at normal service draught.

### Boilers

Information about boilers is recorded only for ships classed with Lloyd's Register or the British Corporation. All pressure values are shown in bar, as well as the equivalent pressure in kilogram-force per square centimetre or pound-force per square inch in parentheses. When details of boilers are recorded in parentheses thus: (AuxB 6,9 bar) (7 kgf/cm$^2$) this indicates that the boiler is temporarily out of use.

| | | |
|---|---|---|
| a | aft | |
| AuxB | Boiler(s) supplying steam to auxiliary services essential to the operation of the ship at sea; but not supplying steam to the main propelling machinery. | |
| c | centre | |
| Comp | Composite (oil & ex.g.) fired | |
| db | domestic boiler(s) supplying steam exclusively for non-essential services, i.e. for purposes not connected in any way with the operation of the ship at sea. Only recorded when working pressure and heating surface exceed 3,4 bar (3,5 kgf/cm$^2$) and 4,7 square metres respectively. | |
| e(ex.g) | exhaust gas economiser | |
| (ex.g) | exhaust gas (boilers) | |
| f | forward | |
| FD | Forced Draught | |
| hs | heating surface. The figure recorded is the total evaporation surface of boilers in square metres plus the total surface of superheaters plus half the surface of economisers and is used for calculating the fees for periodical surveys of water tube boilers. Where the figures are recorded in parentheses they may represent only the heating surface of the boilers. | |
| htr | heater | |
| HWH | Hot Water Heater | |
| bar | 1 bar = 1,02kgf/cm$^2$ = 14.5lb/in$^2$ | Working pressure of boilers |
| kgf/cm$^2$ | kilogram-force per square centimetre | |
| lbf/in$^2$ | pound-force per square inch | |
| lwr | lower | |
| NB<br>NAuxB<br>ndb<br>NWTB<br>nwtdb | New Boiler(s). (The ✠ or ★ indicates that the boilers fitted at the date recorded were built under the supervision of the surveyors to the Rules of Lloyd's Register or of the British Corporation respectively.) | |
| ND | Natural Draught | |
| NNR | New Nuclear Reactor(s) | |
| NR | Nuclear Reactor(s) | |
| (of.) | oil-fired boiler(s) | |
| p or (p) | port | |
| rcv | receiver | |
| s or (s) | starboard | |
| SB | Single-ended Boiler(s) for main propulsion | |
| sg | Steam heated steam generator(s) with working pressure | |
| Spt | Superheater(s). When recorded, the temperature is that of the steam at the outlet from the superheater(s) and the pressure is the working pressure at the superheater outlet. | |
| TOH | Thermal Oil Heater | |
| upr | Upper | |
| WTAuxB | Water Tube Auxiliary Boiler(s) | |
| WTB | Water Tube Boiler(s) for main propulsion | |
| wtdb | water tube domestic boiler(s) | |
